The PowerMedic PowerLaser Basic 500 delivers precise cold laser treatment

The PowerLaser 500 is specifically designed to cater to individuals suffering from pain and inflammation in localized areas. Whether it's a nagging joint ache or a chronic condition affecting your day-to-day life, this powerful device offers you a convenient, focused, and effective solution.

Class 3B Lasers - Effective and Safe

At 500mW of power, the PowerLaser Basic 500 is one of the most effective class 3B lasers available. The PowerLaser Basic 500's 1 laser diode emits safe and therapeutic infrared light at 808nm. This specific wavelength penetrates deep to provide pain and inflammation relief to small joints or muscles.

Even with its impressive power, the PowerLaser Basic 500 remains cool to the touch, ensuring your comfort during treatment. To prioritize safety, PowerMedic has taken extra precautions by widening the laser beam divergence. This measure significantly reduces the risk of eye injuries, with safety classes only necessary when treating areas near the eyes.

PowerMedic Lasers are FDA Cleared and CE Certified

The PowerLaser Basic 500 is both FDA-cleared and CE certified, demonstrating its compliance with rigorous quality and safety standards. This laser device has received FDA clearance for providing relief from muscle and joint pain, reducing arthritis pain, and alleviating muscle stiffness and spasms. It is also CE-certified for addressing conditions such as arthritis, inflammation, epicondylitis, myofascial pain, and wound healing.

PowerLaser Basic 500 High-Quality Design

High-quality design, the PowerLaser Basic 500 ensures long-lasting therapeutic benefits beyond the three-year manufacturer warranty. The device features a user-friendly one-button operation, making it incredibly easy to use. Additionally, it offers two power settings, allowing you to customize your treatment according to your needs.

Compatible with the Laser Acupuncture Lens and Light Guide

The Basic 500 is compatible with PowerMedic's Laser Acupuncture Lens and Light Guide. The Laser Acupuncture Lens focuses the laser beam for pinpoint laser acupuncture treatments. The Light Guide helps treat hard-to-reach areas and can be used in the mouth for dental cold laser therapy to relieve pain and stimulate tissue recovery. Its effectiveness, precision, and versatility make it an indispensable tool in clinics and wellness centers.

With its advanced technology and innovative design, this cold laser device delivers tangible results for targeted pain relief. The PowerLaser Basic 500's easy functionality, versatility, and portability make it an option for both home and office use. Invest in the PowerMedic PowerLaser 500 today!
