Product Description

The **Rigaku KT-100S Handheld Metal Alloy Analyzer** is the perfect tool for precise, efficient metal analysis on the go. Whether you're involved in scrap metal sorting, quality assurance, or positive material identification (PMI), the KT-100S delivers powerful results with its rugged, portable design. With over 6 hours of continuous operation, this lightweight analyzer makes it easy to conduct fast, reliable tests in demanding environments. Take your alloy analysis to the next level with the KT-100S, the most trusted handheld solution for accurate material testing.

Key Features:

- **High-Performance Metal Analysis**: Quickly and accurately identify a wide range of alloys including aluminum, copper, titanium, and stainless steel.
- **Compact & Lightweight**: Designed for easy portability with a pistol-shaped body that allows one-handed operation.
- **Long Battery Life**: Provides over 6 hours of continuous operation on a single charge for extended field use.

- **Rugged & Durable**: MIL-STD-810G certified for drop and impact resistance, and IP-54 rated for protection against dust and water.
- **Advanced QuickID™ Software**: Streamlined, rapid chemical composition identification with minimal user input.
-

Benefits:

- **Efficiency in the Field**: Perform fast and reliable analysis on a variety of metals and alloys with ease.
- **Increased Productivity**: Compact design allows for easy operation in confined spaces, improving throughput and efficiency.
- **Portability**: Lightweight and rugged, perfect for use in industrial settings, scrap yards, or in-field applications.
- **Cost-Effective**: Lower cost of ownership compared to legacy technologies, with minimal maintenance and high performance.
- **Durable for Harsh Environments**: Built to withstand demanding environments, ensuring reliability even in the toughest conditions.
-

Get the **Rigaku KT-100S Handheld Alloy Analyzer** today and enhance your material analysis with this reliable, portable, and advanced tool!
