Product Description —

SciAps LIBS Argon Canister Carbon Analysis – Single Purge Canister for Z-Series Devices

The SciAps LIBS Argon Canister for Carbon Analysis (single unit) delivers the required purge gas for carbon-focused workflows on compatible Z-Series handheld analyzers. This cartridge supports instruments designed for argon-assisted carbon testing, including the SciAps Z-200 C+, Z-300 Series, Z-902 Carbon, Z-903, and Z-901 Carbon. Its compact, threaded format enables quick replacement in field or shop environments where portable carbon measurement and alloy verification must be performed efficiently.

Purpose-Built Argon Supply for Handheld LIBS Carbon Testing

- LIBS-grade argon formulated for carbon and carbon-equivalent measurements.
- Compatible with Z-200 C+, Z-300 Series, Z-902 Carbon, Z-903, and Z-901 Carbon analyzers.
- Supports plasma stability during carbon detection workflows.

- Single-canister format optimized for portable industrial and field applications.

Optimized for SciAps Z-Series Carbon Analysis Performance

This canister maintains the stable argon environment required by Z-Series carbon-analysis modes. By reducing the influence of ambient air during plasma formation, it helps improve precision in applications such as CE determination, weld quality checks, grade verification, and alloy sorting performed using SciAps handheld LIBS analyzers.

Applications

- Carbon measurement in steels and alloy verification.
- Handheld LIBS workflows requiring argon-assisted carbon analysis.
- Portable CE (carbon equivalent) and weld-grade testing with Z-Series devices.
