Product Description

Handheld LIBS Analyzer with Element Pro for Maximum Coverage

The **SciAps Z-200 LIBS Analyzer** is a high-performance handheld spectrometer designed for fast, reliable alloy and elemental identification. Powered by laser-induced breakdown spectroscopy (LIBS), it measures a broad spectrum of elements—including many light elements traditional XRF struggles with. When paired with the **Element Pro** option, the Z-200 expands its elemental libraries, strengthens identification accuracy, and simplifies compliance reporting for PMI and QA workflows.

Key Features

- Element Pro software libraries for broader alloy coverage and smarter ID logic
- Detects critical light elements (C, Li, Be, B, Mg) in addition to transition metals
- Delivers results in seconds for PMI, quality control, and material verification
- Large color touchscreen interface with intuitive navigation

Explore our developer-friendly HTML to PDF API Printed using PDFCrowd HTML to PDF

- Portable and rugged design—about 4 lbs, ideal for field and plant inspections
- Flexible data storage, pass/fail rules, and export options for compliance
- Reduces rescans and operator error with clear results and tailored reporting

Applications Across Industries

The Z-200 with Element Pro is trusted across industries where fast, accurate identification is essential:

- **Aerospace:** Analysis of fuselage alloys, turbine blades, and fastener checks
- **Automotive:** Verification of lightweight alloys and specialty steels
- **Energy & Power:** PMI of in-service components in power plants and refineries
- **Metals Manufacturing:** Alloy grade confirmation and production QA/QC
- **Scrap & Recycling:** Sorting and verification of mixed alloy streams
- **Oil & Gas:** Pipeline, valve, and fitting material inspections

Built for Field Use

Weighing only a few pounds, the Z-200 is engineered for real-world environments. A bright touchscreen simplifies operation, while long-life batteries support extended field sessions. Combined with Element Pro's pre-built libraries and advanced logic, the device delivers confidence even in high-volume or complex alloy inspections.

Certified Value with Cartoli

Every SciAps Z-200 with Element Pro from Cartoli.com is offered as a **certified pre-owned solution**. Each analyzer is tested, verified, and backed by Cartoli's expert support team. For direct assistance, reach us via **toll-free 1-833-322-7865** or **live chat** during business hours. Request a quote today and equip your team with the SciAps Z-200 + Element Pro for fast, accurate, and portable alloy verification.
